

Exhibition sectors: Solutions for all manufacturers

See the world's largest range of solutions for robotics, assembly and handling technology and machine vision. Our leading platform features future-proof automation solutions and key technologies for all branches of industry.

Exhibition sectors for all branches of industry

Discover the entire range of automation for your value chain:
Components and systems, applications and specific services.

→ [Overview of all exhibition sectors](#)

Assembly and handling technology

Explore new solutions for optimizing complex production processes
—from machines and components to analysis, concept development,
planning and software.

→ [Assembly and handling technology](#)

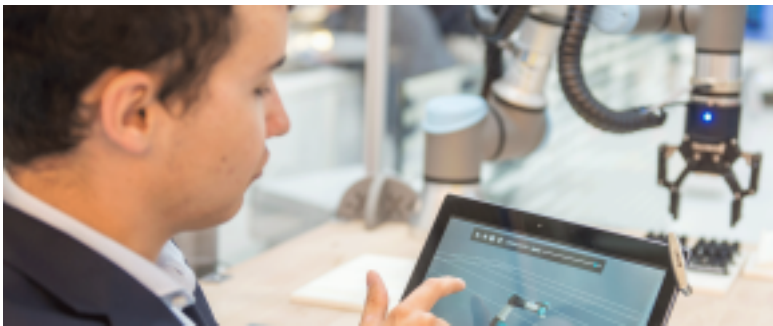

Robotics

Experience the fascinating world of industrial and service robots live at the fair. This comprehensive market overview is only available at automatica.

→ Robotics for all application fields

Machine vision

Compare the innovative possibilities of machine vision. You can choose from solutions for general use or for specific applications.

→ Machine vision

Digital solutions for the Smart Factory

automatica brings the industry and the ICT community together. The IT2Industry subject area offers IT solutions for Industry 4.0.
