

Connecting Global Competence

Messe München

# OPTIMIZE

your Production

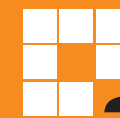

- Assembly and handling
- Machine vision
- Industrial robotics
- Professional service robotics
- Solutions for Industry 4.0—IT2Industry

- Drive technology
- Positioning systems
- Control systems technology
- Sensor technology
- Supply technology
- Safety technology

**New: Smart Maintenance at automatica**  
Optimize your production with intelligent maintenance

Robotics + Automation

**automatica**

The Leading Exhibition for Smart Automation and Robotics

**June 19-22, 2018 | Munich**

# Optimize your Production with intelligent maintenance:

## Welcome at the new exhibition sector Smart Maintenance.

Optimizing production without smart maintenance is inconceivable. Smart maintenance contributes significantly to securing and optimizing the availability of machines, systems and processes.

Digitalizing production has a direct effect on maintenance—maintenance and production are growing together. Smart maintenance is an important aspect of the digital transformation toward flexible production processes such as those required for Industry 4.0. As a result, Industry 4.0 also means Maintenance 4.0.

Integrating an exhibition sector for Smart Maintenance into the range of exhibits at automatica is the logical consequence. The new exhibition sector for Smart Maintenance at automatica demonstrates how digitalizing production is affecting maintenance in all branches of industry.

### Topics

- Predictive Maintenance
- Data Analytics
- Condition Monitoring
- Mobile Maintenance
- Computerized Maintenance Management Systems (CMMS)
- Remote Services
- Augmented Reality
- Retrofit
- Tribology
- Consulting
- Maintenance Concepts and Methods

### Five good reasons to participate

- Unique intermeshing of the topics of intelligent production and smart production at a single event
- Highly relevant to automatica's target group: More than 5,000 visitors at the 2016 fair came from the sectors for maintenance/repair and production planning/control
- 82 percent of visitors are decision-makers, and 19 percent play a key role in the decision-making process (automatica 2016)
- Visitors from all important branches of industry: As an automatica exhibitor, you reach all manufacturing branches of industry—and the automotive, electrical/electronics and metal-processing industries in particular
- Smart maintenance will be highly visible at the fair and in the lecture program

### Participation alternatives for exhibitors

- Individual stand construction
- SUNNY Combination Package
- Smart Maintenance Pavillon (joint pavilion with demonstration scenarios for smart maintenance applications)
